EMTR-2011: Microcontrollers and Digital Logic Assignment 1

Due date: 1:00PM, Wednesday, Sept 25

Question 1

- Do the following conversions:
- (1)  $11101101_2$  to decimal.
- (2) 101011010111 to hex.
- (3) 32BH to binary.
- (4) The following hexadecimal numbers to decimal.
  - (a) 6B2H;
  - (b) 9F2EH
- (5) The following decimal numbers to hex:
  - (a) 75;
  - (b) 938;
  - (c) 2048

## Question 2

Use 2's complement method to do the following subtractions:

- (a) 11011 10101
- (b) 110010 111001

Question 3

Verify the following functions

- (a)  $\overline{x \cdot y} = \overline{x} + \overline{y}$  (De Morgan's law)
- (b)  $x \cdot y + y \cdot z + \overline{x} \cdot z = x \cdot y + \overline{x} \cdot z$  (Consensus)

## Question 4

(a) Design a logic circuit with two inputs,  $x_1$  and  $x_2$ , with required behavior shown in the truth table.

| <u>x1</u> | $x_2$ | <u>f</u> |
|-----------|-------|----------|
| 0         | 0     | 1        |
| 0         | 1     | 0        |
| 1         | 0     | 1        |
| 1         | 1     | 1        |

(b) Use the Karnaugh map to derive the circuit output.

## Question 5

Construction the Karnaugh maps based on the following truth tables and derive the circuit outputs.

| $\underline{x}_1$ | $x_2$ | <u>x</u> 3 | <u>f</u> |
|-------------------|-------|------------|----------|
| 0                 | 0     | 0          | 1        |
| 0                 | 0     | 1          | 0        |
| 0                 | 1     | 0          | 1        |
| 0                 | 1     | 1          | 0        |
| 1                 | 0     | 0          | 1        |
| 1                 | 0     | 1          | 1        |
| 1                 | 1     | 0          | 1        |
| 1                 | 1     | 1          | 0        |

| <u>x1</u> | $x_2$ | <u>x</u> 3 | <u>f</u> |
|-----------|-------|------------|----------|
| 0         | 0     | 0          | 0        |
| 0         | 0     | 1          | 0        |
| 0         | 1     | 0          | 0        |
| 0         | 1     | 1          | 1        |
| 1         | 0     | 0          | 0        |
| 1         | 0     | 1          | 1        |
| 1         | 1     | 0          | 1        |
| 1         | 1     | 1          | 1        |
